

SILPOT™
सिलपॉट

"Silpot Any Time, Result Everytime"

SilPot is a magical blend of **simple silicates, monomeric and polymeric silica** and Potassium as K_2O . It has **Thermodynamically Activated Silica** specially **derived from Bio-Mass** and technically formulated with Potassium.

SilPot is a Super Supplement beneficial to Plant Growth, Health & Protection, Yield and Crop Quality.

- **SilPot** creates **Strong Cell Wall, bigger branches & stem**. This improves uptake of water, nutrients and plant secretions. Also helps the plant bear the load of the fruits at later stage.
- **SilPot** enables enhanced metabolic function, with **higher rate of photosynthesis**.

- **SilPot** accelerates **synthesis of protein and starch**. **SilPot** activates at least **60 different enzymes** involved in plant growth.
- **SilPot** is recommended for use at every stage and on every crop. Normally it starts showing result within 3 days of application and builds with every spray.

- Naturally **SilPot** supported plants are strong enough to combat various **biotic and abiotic stresses**.
- **SilPot** helps plant sustain extreme weather conditions, drought spell, heavy rain etc.

Shelf life
3 years from manufacturing
Packing
5000, 1000, 500, 250, 100, 50 ml

green earth®

SILPOT

सिलपॉट

Superb Action against - Fungus, Sucking Pest & Mites

- **SilPot** enables the plants build up a **physical mineral barrier lining the cell**. This resists the entry of pathogens. Insects cannot feed easily and hence their growth is restricted.
- **SilPot** also activates production of polyphenolic compounds-plants natural defense mechanism against fungal and insect attacks.
- **SilPot** forms silica fortified areas around Fungal infected sites. This resists the entry of pathogens inside plant.
- **SilPot** has shown good results in treatment and control of **Rust, Powdery Mildew, Pythium** (causing root rot & damping-off), **black spots, phytophthora** etc.
- **SilPot** also shows good control against most mites & sucking pests.
- **SilPot** is best product as first **line of defense** against Fungal, Mites and Sucking Pest.
- Use of **SilPot** along with **Fungicides, Insecticides & Pesticides** has shown remarkably enhanced efficacy and **faster rebound** by the plant.

Dose & method of application

Foliar Spraying with 2 ml / lit of water at every 15-20 days interval any crop stage gives very significant results.
